

**“SRIMATI MITHILESH TEWARI” MEDALS OF HONOR FOR ACADEMIC
EXCELLENCE**

Mrs. Mithilesh Tewari was born and raised in the state of Uttar Pradesh, INDIA. She was a loving mother, compassionate human being, devoted wife, teacher, avid animal-lover, and a highly spiritual person, with deep belief in “Hindu Kanyakubja Brahmin” values. She got married at an incredibly young age to a budding professor in India, and completed her high school, Bachelors, Masters and Bachelor of Education after her marriage while carrying responsibilities of both as a mother and a wife. She always helped others selflessly, whether strangers or people she knew. She always believed in education and educated her sons well. Special to her heart was her middle son- Guddu, who was close to her since he survived many life- threatening illnesses since birth. Despite medical doctors/specialists & hospitals giving up on him, she always believed in Guddu’s survival and complete recovery, and prayed for his survival constantly. It was due to her blessings, Guddu survived and became immensely close to her and always followed her advice and was a typical “mama’s boy”. Guddu, who had been very keen to please her mom, ended up becoming an extra-brilliant student, and mostly stood first in his class since Grade 3, and was in India’s National Merit List in his high school. He also achieved Gold Medal in his undergraduate program in Agricultural Engineering with the College of Technology, GB Pant University of Agriculture & Technology, Pantnagar, INDIA, and received graduate research assistantships and scholarships to come to USA/Canada for his graduate studies in 1994. He completed his grad studies with the University of Manitoba, CANADA, and rose to senior VP level positions within a noticeably short span of time with companies in USA/Canada. He invented a process: Zero-OxTech®, and built a multi-million-dollar business by commercializing his invention through his company, Tewari De-Ox Systems, Inc. He dedicates all his blessings to his mom, who died at a tender age of 42, and was not there to see the achievements of her son but Guddu believes she is there with him always in spirits. Mrs. Tewari died when Guddu [known as Dr. Tewari “DOC” in business circle] was only 24. It is only due to his mom’s blessings and spirits, that Guddu continues his journey to become an excellent businessman, a successful industrialist, and a compassionate human being, and intends to help and support others to carry out strong academic background in whatever capacity he can.

Dr. Tewari lives in Richmond Hill, ON, CANADA, with his wife, Astha, who is a professional and gifted fine artist; two brilliant and compassionate children, son: Anat and daughter: Aishani, and fur-children, Champion Great Danes: Brutus, Rio, Blushy, and Roman. Anat attended private boarding with Canada’s prestigious university prep-high school: Ridley College, and received \$500K+ work of financial awards with several US universities and recently completed his undergraduate in Biomedical Engineering from NY, USA and works in Boston, MA, USA. Aishani, also attended private high school, and is a sophomore in Biological Sciences with University of Waterloo, ON, CANADA. Dr. Tewari’s mission is to help students who for financial reasons could not reach their academic goals and to fight against animal cruelty globally, in memory of his beloved mother, Mrs. Mithilesh Tewari.
